

## ABSTRACT OF THE DISCLOSURE

System, methods, and computer program products for facilitating negotiations for reinsurance of a risk. The negotiations for reinsurance of a risk are conducted between a cedent and one to many assumers. An interface is provided for allowing submissions of risk for reinsurance, responses from selected assumers, and replies to the responses as necessary to continue or conclude the negotiation. The interface also allows users to view information exchanged during various stages of the negotiation. Additional functionality including categorizing risk, categorizing reinsurance, required distribution, distribution preferences, and endorsement agreements are also provided.
